Clip with Caution

What's worse? Holding your squirming baby down while you try to trim her nails without removing the top half of her pinkie, or dealing with claw marks from unclipped nails? Now one of them doesn't have to be so painful...for you or your little one. [Baby Light and Clip](#) makes the job super simple by illuminating under your child's fingernail (great for sneaking into her room at night to trim while she's asleep) and has a safety guard to prevent the fingertip from being snipped by the clipper blades. But it gets better... the clipping tray avoids messy clean ups, and a comfort control handle gives you a non-slip grip. Yay for keeping little fingers intact!
