Shine a Little Light

The simple ideas are often the best. Case in point - the ingenious [Baby Light & Clip](#). Designed by mom inventor Laurie Gadbois, it takes the stress out of trimming tiny baby nails while they're sleeping by illuminating baby's fingertip and showing just where to clip. Safety guards help avoid nicking tender skin and a built in compartment collects the clippings. And we're not the only ones who think it's great - its won a string of plaudits since it came onto the market including Parenting Magazine Editors Best Pick and iParenting Media awards. Buy online from [Baby Light & Clip](#) for \$14.99.
